### Superior Repair Solutions

Schenck Process knows that maintaining operation of critical plant equipment is vital for its customers. Therefore, we have put together a repair and rebuild program that quickly responds to situations where equipment has been damaged or is out of commission, which helps reduce costly downtime. We believe in full product and process support.

### On-site Solutions

Our on-site experts will find solutions to your everyday issues. A skilled expert will travel to your location and evaluate your equipment and process applications. They will work with engineering, operations and maintenance departments to help increase productivity, decrease down time and reduce maintenance costs.

#### Rotary Airlocks and Diverter Valves

- Rebuild of all major brands
- No cost teardown and evaluation
- Full factory warranty for 12 months
- Original factory standards and tolerances

#### Blowers and Vacuum Pump Packages

- Rebuild of all major brands
